

Mobile Food Delivery App - Software Testing

Advanced Testing Report

Read the full advanced testing report here:

[2.2_Advanced_Testing_Report.md](#)

1. Introduction

The Mobile Food Delivery App is designed to provide a seamless food ordering experience for users. This document outlines the software testing strategies and procedures employed to ensure the delivery of a high-quality product.

2. Testing Objectives

- To verify that the application functions as intended across all features.
- To ensure the application is user-friendly and accessible.
- To identify and fix any bugs or issues before the official launch.

3. Testing Scope

The testing will cover the following aspects:

- Functional Testing
- Usability Testing
- Performance Testing
- Security Testing

4. Testing Tools

We used the following tools for testing the application:

- Selenium for automated functional testing.
- JMeter for performance testing.
- OWASP ZAP for security testing.

5. Test Cases

Test cases were developed for each feature of the application. Here are a few examples:

- **TC01:** Verify that the user can register successfully.
- **TC02:** Verify that the user can log in with valid credentials.

- **TC03:** Verify that the user receives an error message when logging in with invalid credentials.

6. Test Results

The testing team executed all test cases, and the results are documented in the test management tool. A summary of the results is as follows:

- Total Test Cases: 100
- Passed: 90
- Failed: 10

7. Defect Tracking

Defects were logged in the issue tracker with the following details:

- Title
- Description
- Steps to Reproduce
- Expected Result
- Actual Result
- Status (Open/Closed)

8. Conclusion

The testing phase has been completed, and the application is ready for deployment. All critical and high-severity defects have been fixed, and retested successfully.

10. Appendices

10.1 Test Case Document

The detailed test case document can be found here: [Test_Cases_Document.md](#)

10.2 Test Data

Test data used for testing can be found here: [Test_Data.xlsx](#)

10.3 Testing Schedule

The testing schedule is as follows:

Date	Activity
2023-10-01	Test Planning
2023-10-05	Test Case Development
2023-10-10	Test Execution
2023-10-15	Defect Logging and Retesting
2023-10-20	Test Closure

10.4 Team Members

The testing team consisted of the following members:

- Muditha Kumara - Test Lead
- John Doe - Test Engineer
- Jane Smith - Test Engineer
